Australia's Vanishing Wildlife: Decline, Threats, and the Path to Recovery

The Big Picture: Twenty Years of Wildlife Decline

-62.6%	429	78.4%	+729%
Population Drop	Protected Animals	Invasive Species	Sanctuary Recovery

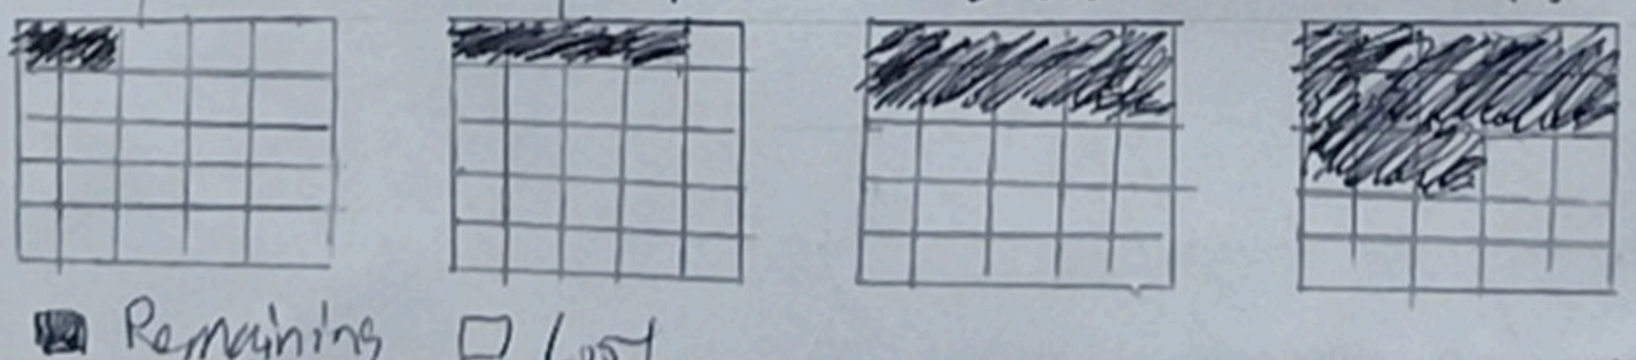

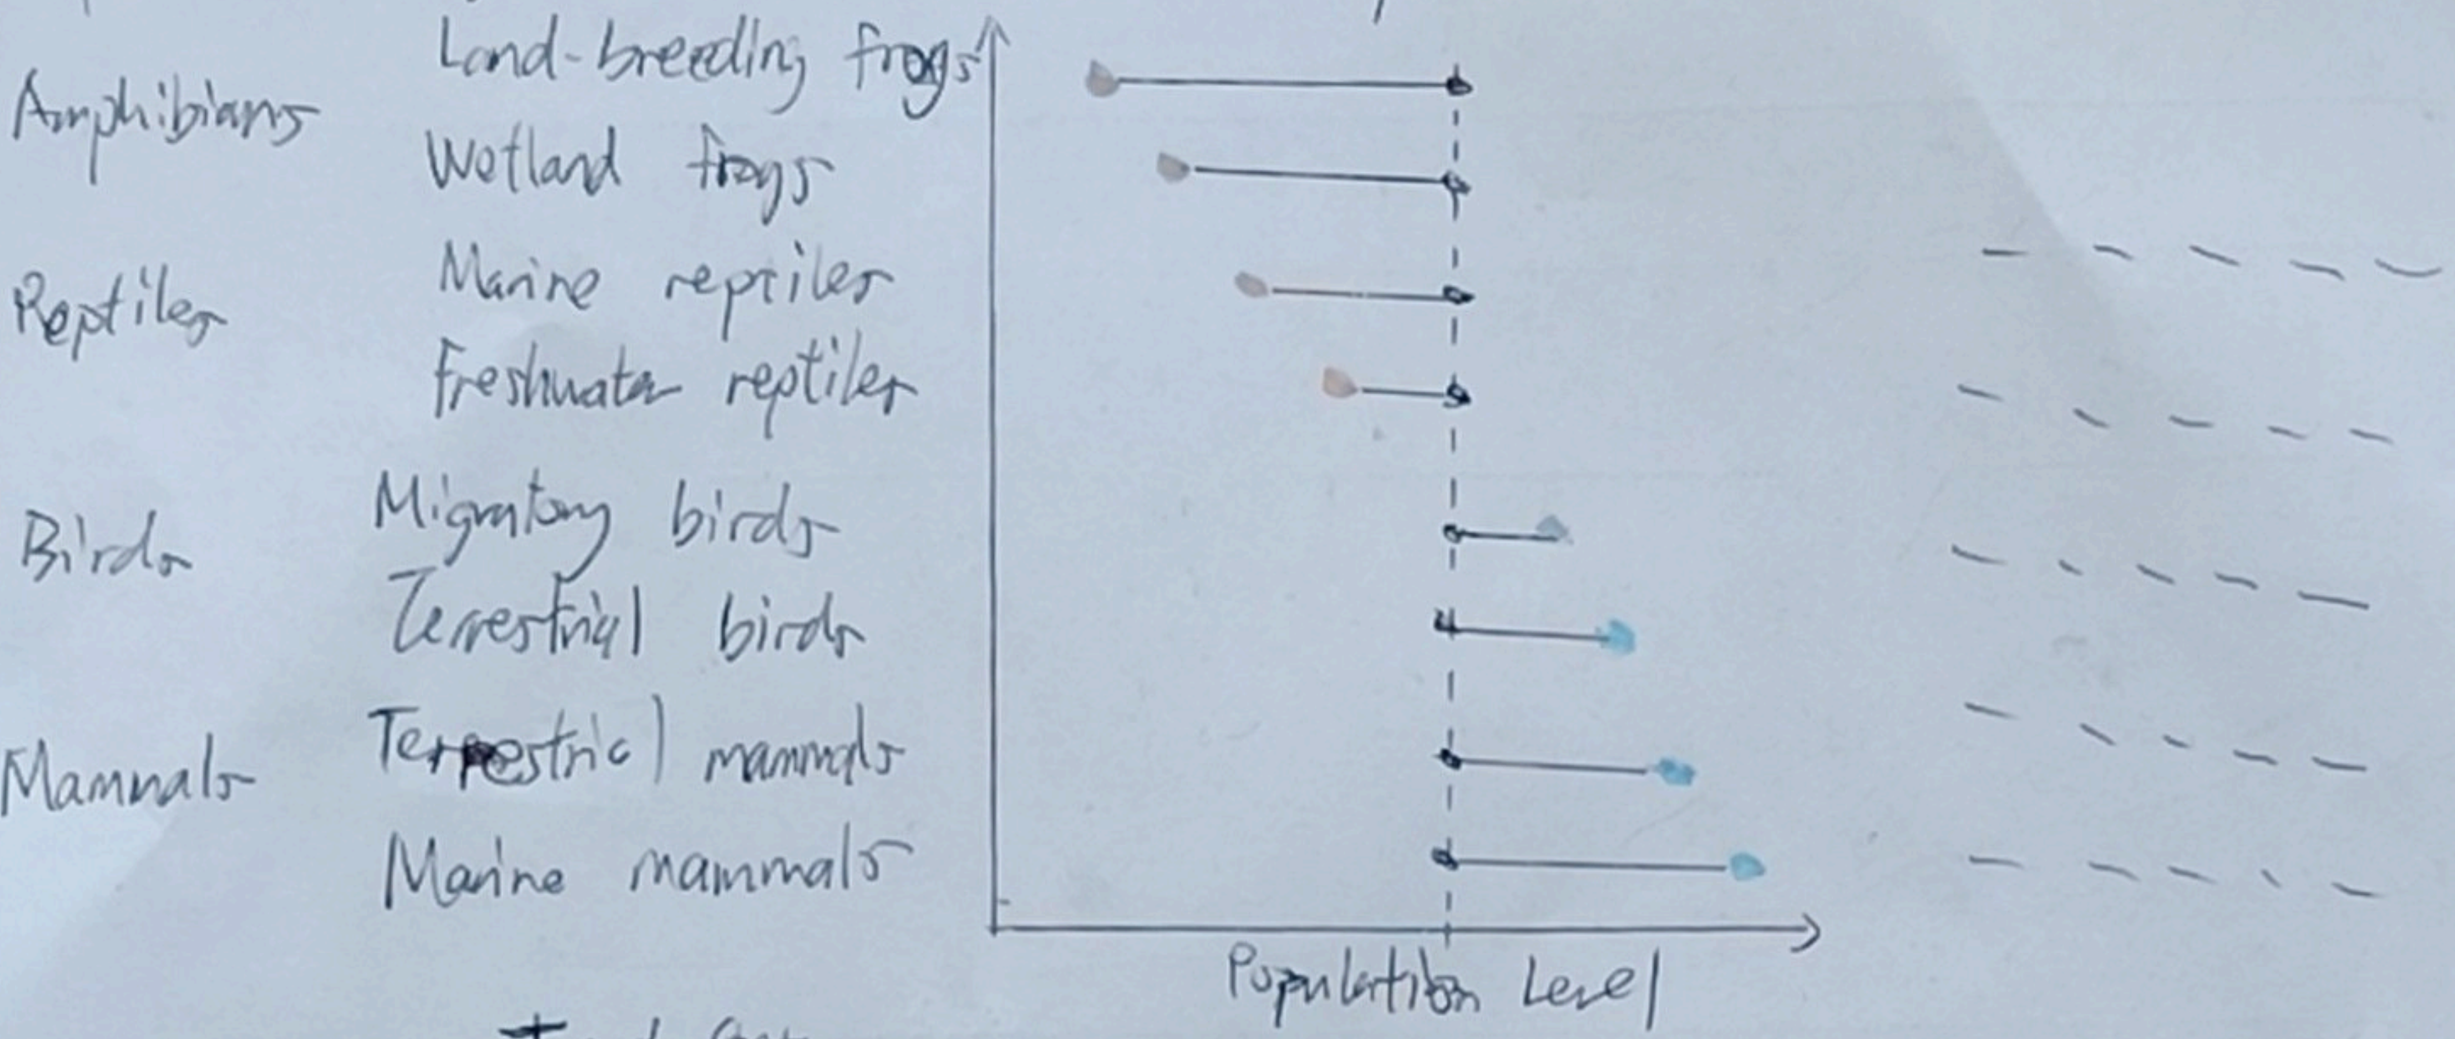

Section 1

Which Animal Groups Are Losing The Most?

Long Term Population Lost vs. Remaining

Population Change Across Animal Sub-Groups

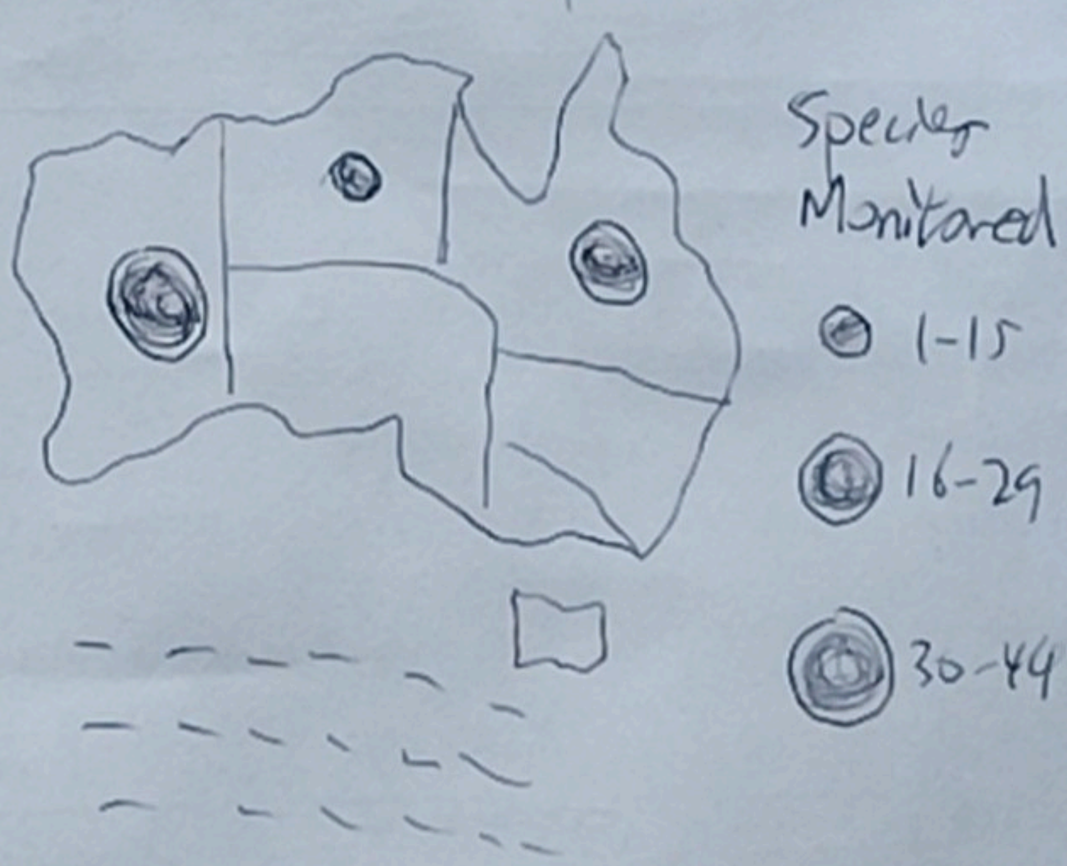

Section 2

Where Wildlife is Vanishing vs. Where Scientists Look

State-Level Wildlife Population Decline

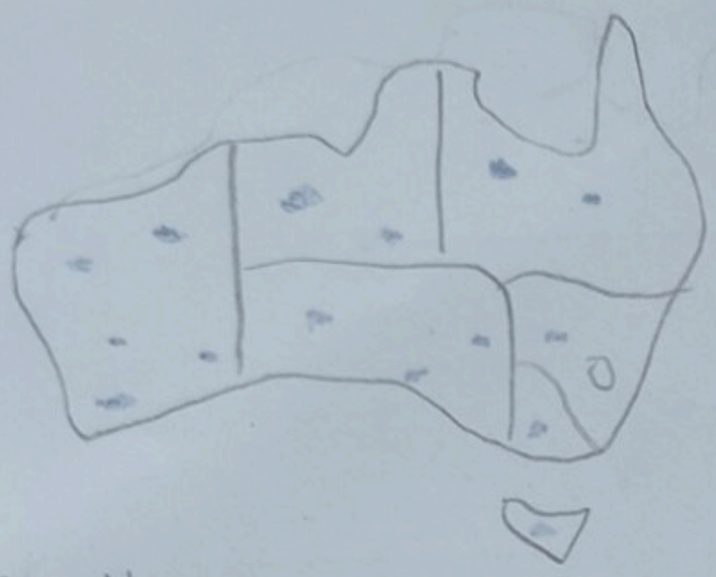

Distinct Threatened Species Tracked

Field Survey Geography Across Animal Groups

Birds (397 sites)

Mammals (154 sites)

Reptiles (35 sites)

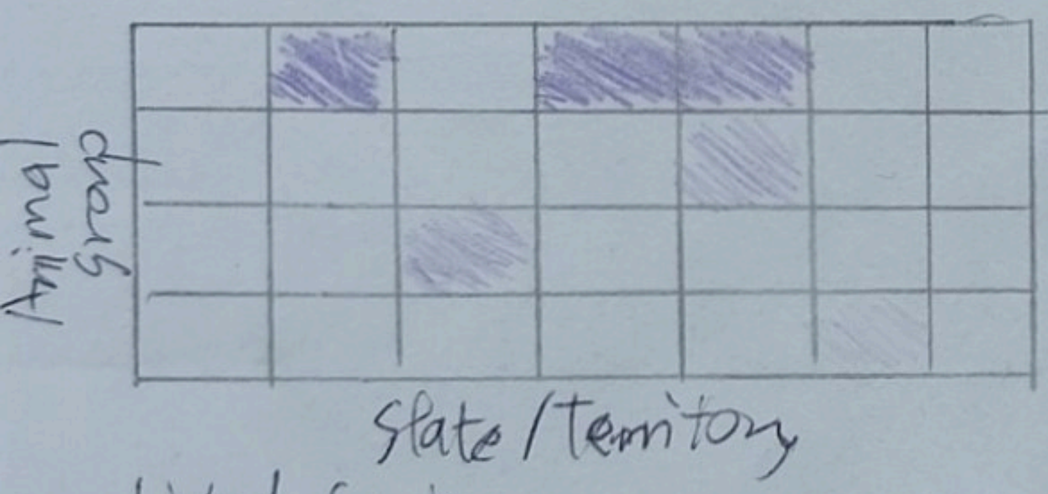

Amphibians (44 sites)

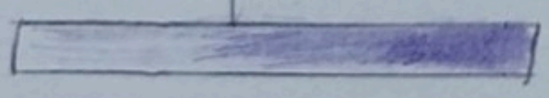

Section 3

Where Protected Wildlife Live and Their Extinction Risk

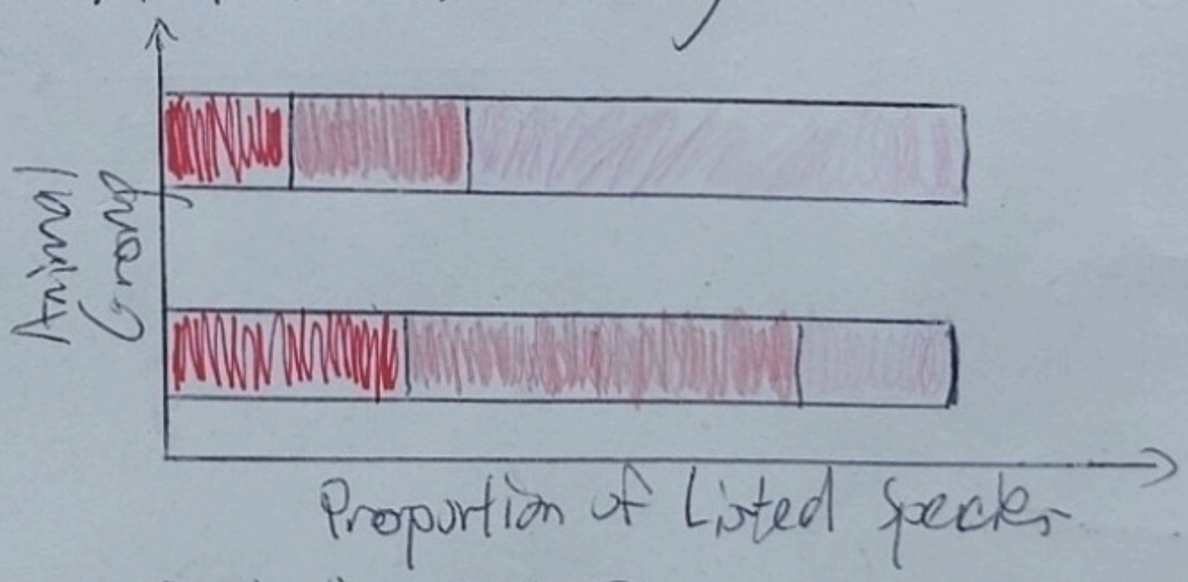

Threatened Wildlife Listed

Listed Species

Extinction Risk Severity

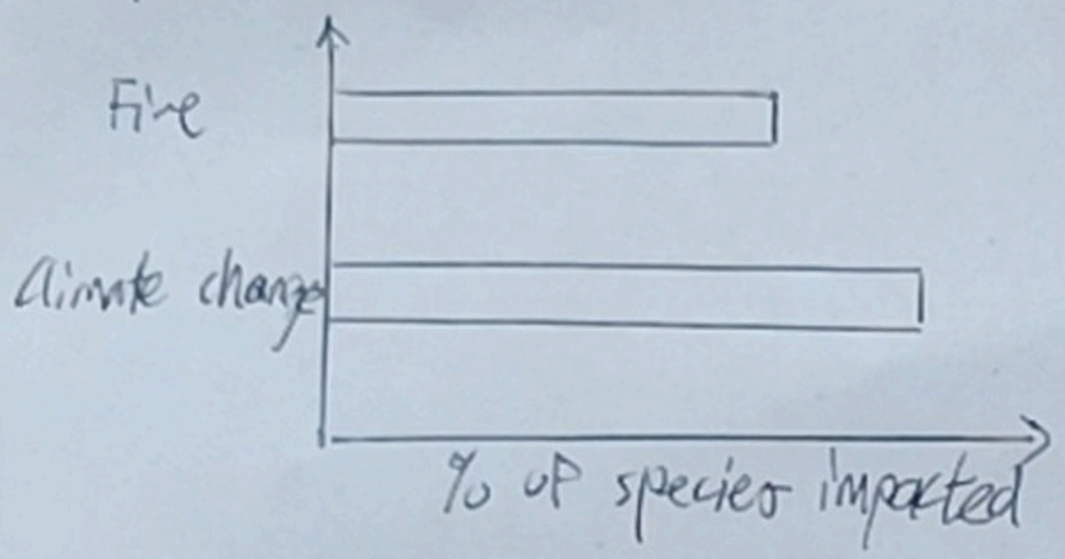

Extinction Risk Tier

- Critically endangered
- Endangered
- Vulnerable

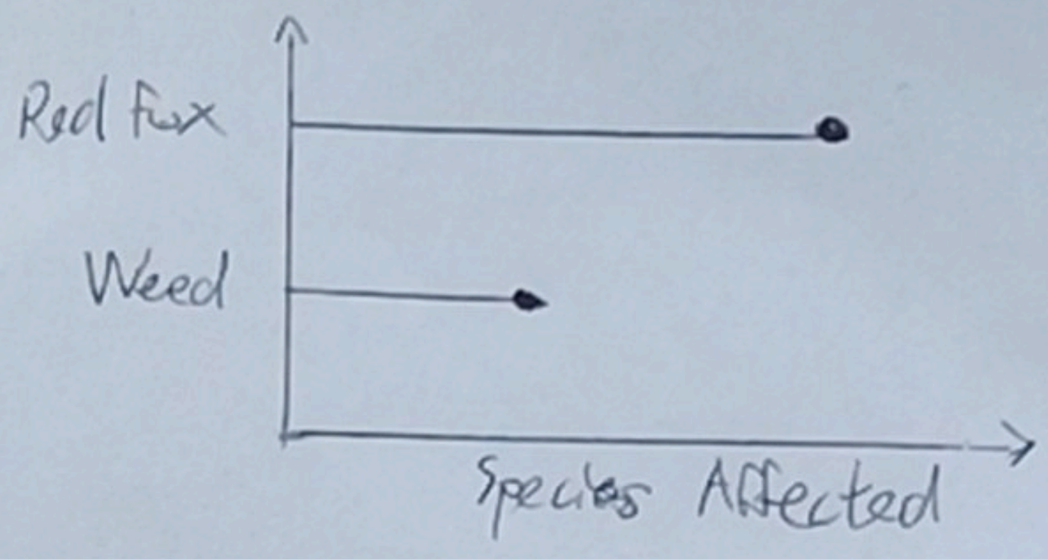

Section 4

What is Pushing Australia's Wildlife Toward Extinction

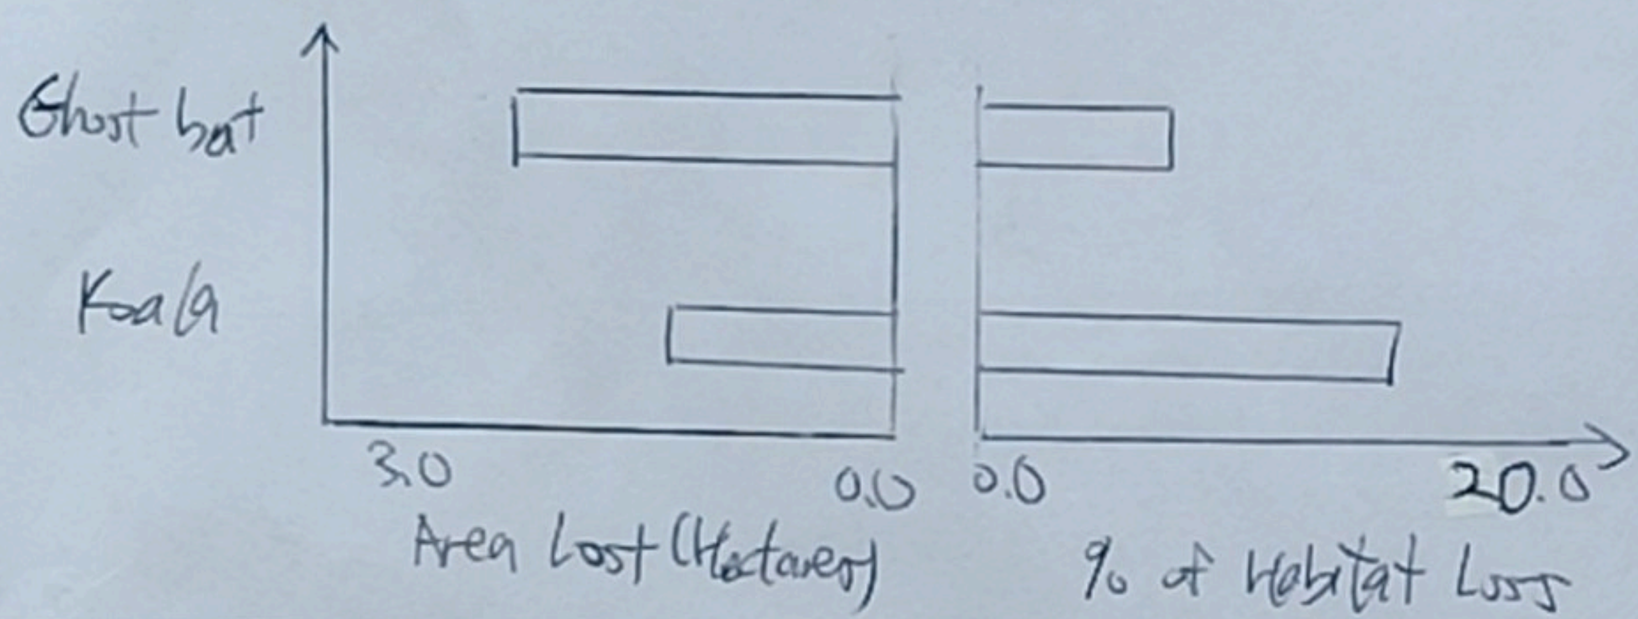

Top Threat Pressures

Deadliest Invaders

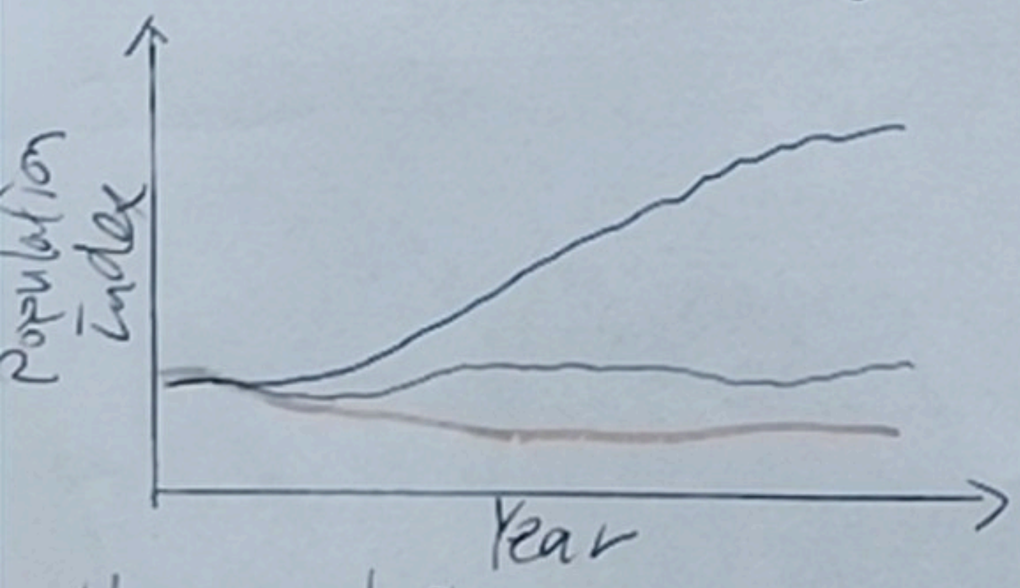

Land Clearing: Total Area Lost vs. Habitat Shore Destroyed

Section 5

What Actually Works in The Wild vs. The Funding Gap

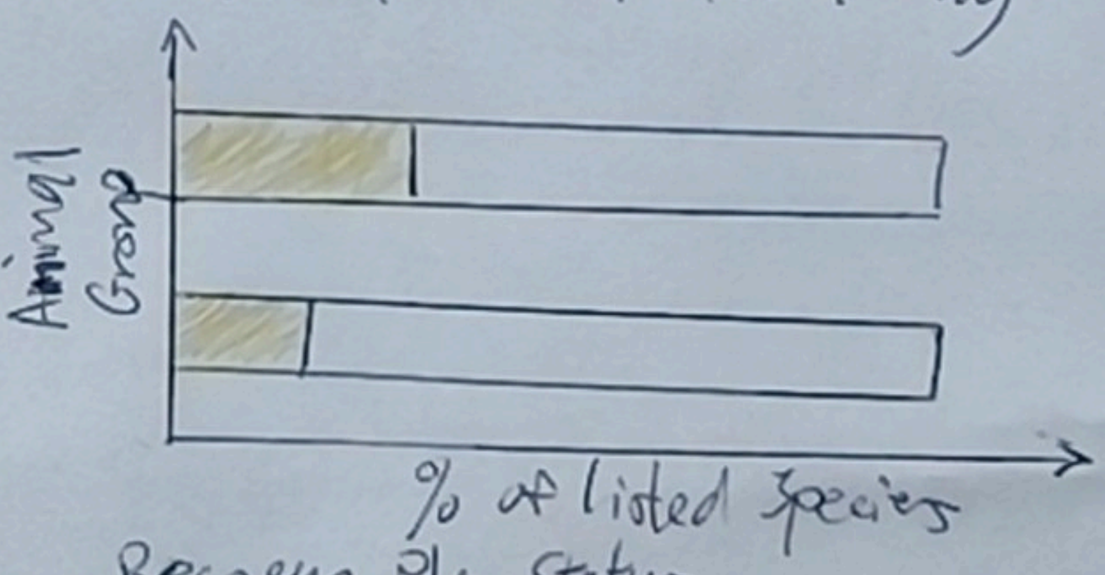

Threatened Mammal Recovery

Management Status

- Predator-free
- Any known management
- No known management

Government Action Plan Priority

Recovery Plan Status

- Action Plan Priority
- Other Listed Species
